

## Michigan State Police Home Security Survey

Most residential burglaries and thefts are crimes of opportunity and involve very little planning on the part of the thief. Knowing about burglars' three worst enemies - light, time, and noise, can help you safeguard your home from becoming an easy target. Reducing the risk of break-ins is simply a matter of making your home less attractive to criminals searching for quick and easy targets. The majority of residential burglaries are preventable if homeowners follow common sense steps in improving security.

In the efforts of reducing crime, the Michigan State Police has developed a Home Security Survey. Taking the time to complete this survey and reviewing your personal security situation can greatly reduce your risk of becoming a victim. After completing the survey, you will have a more complete understanding of the strengths and weaknesses of your home, as well as a checklist of areas for improvement.

Begin the survey by walking to the end of your block or the boundaries of your property. Remember that criminals and thieves are looking for homes that they can enter quickly, quietly, and without being seen. Try to "think like a thief" and ask yourself, does my home look like a target? Do you have tools, bikes or other valuables laying around in the yard? Is your garage door open? Do your windows and doors appear secure? Do trees and landscaping obstruct views of your home from neighbors or street traffic? Are gates closed and locked? Does it look like you take good care of your property, or would a thief look at your home and see an easy target?

Survey Instructions:

When completing the security survey, try to follow along the list and don't skip over any

areas of your home. Keep in mind that every home and property will be different. In each category and item, rate your security by circling OK or NI (needs improvement). When the survey is completed you can use the list of items circled "NI" as a to-do list.
